# EPIGEN™ NEW FROM WYSONG!

## FIRST STARCH FREE FOOD!

www.wysongepigen.net

### Unique Epigen™ features:

- Is the first extruded dry diet/kibble pet food (patent pending) that is Starch Free™ (Epigen™ does what “Grain Free” pet foods only pretend to do)
- More closely resembles the food your pet is designed to eat
- Contains an unprecedented 60+% meat and organs and over 60% protein
- Has the natural flavor and taste that pets truly desire
- Is replete with all the critical food elements Wysong was first to put into pet foods – probiotics, prebiotics, enzymes, phytonutrients, nutraceuticals, natural form antioxidants, vitamins and minerals
- Is rich in omega-3 and other essential fatty acids
- Is made in the USA at Wysong manufacturing facilities with ingredients from USDA and FDA approved domestic sources

Wysong Epigen™ represents the first important kibble pet food innovation in almost 60 years (patent pending) and moves conventional dry extruded pet foods much closer to the high protein meat-based, starchless foods carnivores are genetically designed for. With that, they are given greater opportunity to enjoy their full natural health. Epigen™ is equally appropriate for both cats and dogs.

Crude Protein (Min) .....	60.0%
Crude Fat (Min) .....	11.0%
Crude Fiber (Max) .....	3.5%
Moisture (Max) .....	12.0%
